Professional Summary

Engineering student with a strong foundation in programming, data structures, and problem-solving. Proficient in Python, Java, and C, with hands-on experience in academic and personal projects. Focused on building efficient, scalable solutions and continuously improving technical skills.

Technical Skills

- **Programming:** Python, SQL, Java,C,C++
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming, Problem Solving
- **Web Technologies:** HTML,CSS and JS
- **Visualization Tools:** Power BI, Tableau
- **Databases:** SQLite, MySQL
- **Other Tools:** Microsoft Excel, Git, Linux,VS Code,ChatGPT

Projects

Student Management System

Python, MySQL

- Designed an application to manage student records with add, update, and delete functionalities.
- Implemented data storage using file handling/database for efficient record management.
- Added features like search, filtering, and basic performance tracking.

Weather App

Python, REST API

- Developed a weather application using API integration to fetch real-time data based on user input.
- Displayed key information such as temperature, humidity, and weather conditions.
- Implemented error handling for invalid inputs and improved user interaction.

Library Management System

Python, MySQL

- Built a system to manage book records, including issue and return operations.
- Implemented database integration to track availability and maintain records.
- Added features like search functionality and fine calculation for late returns.

Education

B.E. Computer Science Engineering

2024 – 2028

Animeera College, Vellore

Percentage: 85%

Certifications

- AI for India 2.0 – GUVI (Python, Data Preprocessing, ML Basics)
- Python Programming – GUVI
- Generative AI for Beginners– Udemy

Achievements

- Secured **3rd Place** in an Intercollegiate Hackathon under Thiruvalluvar University.
- Led data visualization and analysis using Excel and Python in the final round.
