CAREER OBJECTIVE

Motivated fresher and aspiring Full-Stack Developer with hands-on experience building **React**, **Node.js**, and **Tailwind CSS** applications, and a solid foundation in **Python**, **JavaScript**, and **SQL**. Recently built and deployed an **AI-powered full-stack project** integrating the OpenRouter API for LLM-based code generation. Currently interning in **Generative AI** with practical exposure to **prompt engineering**. Actively strengthening **Data Structures and Algorithms** skills through daily practice. Eager to contribute to a junior developer role and grow within a collaborative team.

EDUCATION

Government Engineering College, Haveri <i>Bachelor of Engineering – Computer Science and Engineering</i>	CGPA: 8.74 Dec 2022 – May 2026
Moraji Desai Residential Science PU College, Yellapur <i>Pre-University College (PCMB)</i>	Percentage: 97% Jul 2020 – Apr 2022
Government High School, Halemannangi <i>Secondary School Education</i>	Percentage: 95.52% Jun 2017 – Apr 2020

EXPERIENCE

AI Intern – Generative AI & Agentic AI <i>LearnersByte (Mahaprabha Tech Career Hub LLP)</i>	Jan 2026 – Present <i>Remote Internship</i>
- Applying prompt engineering techniques to design effective prompts for Generative AI models, producing accurate and context-aware AI-generated content. - Exploring agentic AI concepts and automation workflows as part of structured internship training, building foundational knowledge in autonomous AI systems. - Working with no-code and low-code AI tools to deliver hands-on, project-based solutions and gain practical exposure to real-world AI development workflows.	

PROJECTS

AI-Powered Website Builder <i>React.js, Tailwind CSS, Node.js, Express.js, OpenRouter API, JavaScript</i>	GitHub Live
- Built a full-stack AI-powered application that generates complete, ready-to-use websites from natural language prompts using OpenRouter API and LLM-based code generation. - Developed a responsive React + Tailwind CSS frontend with a real-time prompt interface, live website preview, and one-click code download functionality. - Engineered a Node.js/Express.js backend to handle API routing, manage OpenRouter requests, and serve AI-generated HTML/CSS/JS output securely. - Applied prompt engineering best practices to guide the LLM in producing structured, deployment-ready website code from user descriptions.	
Jobby App – Full-Stack Job Search Platform <i>React.js, Node.js, REST APIs, JWT Authentication, React Router, JavaScript</i>	GitHub
- Implemented JWT-based authentication with protected routes, secure login/logout, and unauthorized access handling via HTTP cookies. - Built dynamic job search with multi-filter support (employment type, salary range, keyword) using RESTful API integration. - Engineered API integration layer with loading states, retry mechanisms, and failure/empty-state views for a production-grade user experience. - Designed job detail and similar jobs views with seamless React Router navigation and external website redirection.	

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3, C++ (basics), MongoDB (basics)
Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, React Router
Web Technologies: REST APIs, JWT Authentication, HTTP Cookies, Responsive Web Design, State Management
AI & Tools: OpenRouter API, Prompt Engineering, Generative AI
Developer Tools: Git, GitHub, VS Code, Vercel
Core CS Concepts: Data Structures & Algorithms, OOP
